## SYSTEM-THEORIE — a12

**Inventor: Niklas Luhmann  Year: ~1914**

A **System** is made out of **Elements [E]** or several **Subsystems** ( = abstracted an Elemnt too). The Elements have relations (**Relations [R]**) and the relations have (German: **Konditionierende [K]**) that describes how the Relations have to be. The Law or the Bible or the Koran(?) or Karl Marx "Das Kapital" could be such a "Konditioniernde". This helps to undestand the big picture, Social-, Mechanical-, Biological-, Computer- Systemes or Soaftware.

For example if you have QuantumInserts, Tarmoil Turbine you could also filter or inject words that would make the victim look or drive insane.

## DESIGN PATTERN — a7

| | | |
|---|---|---|
| C Abstract Factory | S Facade | S Proxy |
| S Adapter | C Factory Method | B Observer |
| S Bridge | S Flyweight | C Singleton |
| C Builder | B Interpreter | B State |
| B Chain of Responsibility | C Iterator | B Strategy |
| B Command | B Mediator | B Template Method |
| S Composite | B Memento | B Visitor |
| S Decorator | C Prototype | |

**Inventor: Christopher Alexander Year: ~1977**

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psycholog design pattern) some assholes use to foced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Juilan Assange talked about at HITB SecConf 2009 Malaysia...

---

## Suicide Death BOT – Spinal Cord — a16b

**RISK SCORE: 10**

**Inventor: xxxx  Year: ~???**

Even more worse than a Suicide Death Bot that induces a Psychosis with Electronical-/Psychological War to induce a suicide (attempt) would be some sort of Suicide Death Bot like Stuxnet that attacks the Spinal Cord Implants of eg. Whistleblowers, Whitehat Hackers or people that asks "to many" questions or people allied with such people, i mean with "rapist-terrorists".

---

## Batch Achievement — a4

**Discoverer: Trevor Paglen  Year: ~2010**

Each (sub-)culture has its, heroes, enemies, rites, symbols and "secrets"

Trevor Paglen "collected" such symbols and wrote a book: **"I Could Tell You But Then You Would Have to Be Destroyed By Me:** Emblems from the Pentagon's Black World" Find those symbols of common sense and you will find maybe hints to the truth and the whole picture. I'm not sure if such symbols are "The Mark of Cain" or symbolize just a group membership in the real world or in computergames. But beeing member of a bigger system maybe compensates also low self-esteem, question would be, who caused the low self-esteem initially

---

## Hierarchy — a13

**Inventor: Satan  Year: ???**

Hierachical Systems tend to lack Moral. Most Compynies have hierarchical structure often they abuse small left wing people in the lowest rank to make the customers think that the company and its management is good and trustworthy. In case such a left wing puncingball would upgrade to a Whistleblower and find out about the dark management and that they abuse the young people as such punching balls they would possibly attack him with a16, m38, t15.... Maybe played with a14, which means that there will be also some bad left wing people.

The Sad thing is, that this is business as usual.

---

## Military Rank — a3

**Oberst** — 36 | 33

**Fach-offizier** (FachOf) — 50

**Inventor: Satan / Romans?  Year: ~-500**

People tend to subjugate other people and making them "usable" for their own profit. Globally there are many of such systems that use things like dt1 card to enslave people people. Right-Wing people seem to thrive in Military Systems. Maybe not even by their own will but they have had maybe dominant parents and learned that it is liked with less pain if they just do what the older person says. I myself was always rebel and begun early to question things the older generation said. This way I went is possibly more painful since you must defiend against the older generation and consider that the younger that help those olders and obey their order attack you from two sides. And it would not be fair to be mean to the younger.

---

## ARTIFICIAL INTELLIGENCE — a11

0 (max)
1 (min)
2 (max)
3 (min)
4 (max)

**Inventor: Isaac Asimov?  Year: ~1960**

Artificial Intelligenc, but also Propositional calculus (German) Prädikatenlogik ( = eg PROLOG) or learning algorithms, the so called singularity is meaybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many yearss ago. Companies are Artificial Intelligences too, but mostly from the dark side of the force. If you want to learn it maybe begin with **mini-max-algorithm and Tic-Tac-Toe**

Controly your **touring complete** Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...

---

## Bijektivitaet REVERSIBILITY — a15

Die Funktion $f: \mathbb{R} \to \mathbb{R}, x \mapsto x + a$ ist bijektiv mit der Umkehrfunktion $f^{-1}: \mathbb{R} \to \mathbb{R}, x \mapsto x - a$.
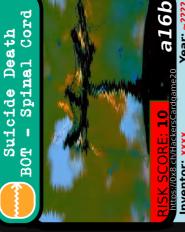

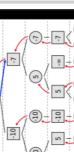

# REVERSIBILITY

*Floppy kindly please his mistres (1979) to crack him down. He forgets to play this Card*

**Inventor: Good  Year: ???**

If you need to punish someone then do it bijective. Best thing is not to attack a person physically or in the mainframe, or with cyberwar... you could risk his or your life. There are seldom cases, for example if they want to (cyber-) | rape | attack | your girl... in this case it is possibly ok to defend yourself and younger against the offender. Keep in mind that you defend yourself without causing permeent harm. Maybe the offender is remote controlled. See cards t1....t*

If there is something like death sentence for example in texas then and would kill an innocent you would find that out to late, then the whole state could sentenced to death to. In Switzerland there are no official death sentences.
