Interface for Social-Psychology Design Patterns — m137

Inventor: xxxxx   Year: ~???

The PsyOPs seem to work in different Groups, one group tries to manipulate the Whistleblower or Whitehat, the other group seems to manipulate the family of the Whistleblower. They have touring complete avatars of all people you know, so it's quite hard to find out what is true communication(s) and what is simulation. Separation from his socail systme makes it more difficult. One move of my Shrink was to tell me to catch up on my past, and my father he told not to catch up with his past. So he can inject the word "catch up" to generate an antagonizing situation (m50). I guess technically there would be some interface between such two world-views, maybe some sort of crash detection that wants to crash people intentionally. further research required.

Porn — m12

don't lock under this image (in the original svg)

Possibly only kids that are being isolated begin to watch excessive porn, so before you punish a young adult because he consumes porn analyze first his childhood.

Inventor: xxxxx   Year: ~???

Reproduction (therefore sex) was vital for preservation of species. This early Part of brain has influence to individuals. If your NeoCortex doest't know about Vulnerability they can easily psy-backdoors you, for example sell overpriced cars by simply putting a halfe naked women on top of car (eg t1 card: "The woman ins inclusive") Limbic system, is responsible for processing emotions & instinctive behavior. Sexualitätsdispositiv (Michael Foucault) Can drive people to do things they would normally not do. A healthy and consensual sexual life is maybe even good for the Endocrine System. The old People play such cards (and obfuscate with mos2) mainly to obfuscate technology cards, especially if we find *Youporn should only allow kosher (BDSM-)porn, one slave agrees with what will happen and a scene after the act where she / he says that everything is ok.*

3D model of victims body — m99

Inventor: xxxxx   Year: ~???

Like the m98 Card they seem to have also a 3D model of my body, most likely generated from a RetinaCCD (eye1) and they also add eventtriggers (t14) then eg activates eletronic psychological warfare, eg chains like co6 ⇒ m32 ⇒ m94 ⇒ m44 ⇒ m93.

Not yet found out how to workaround that problem, i will update this card when i found out, and maybe make some videos to explain.

This card seems to have several DEFCON Level

If i say: "$Shrink now asked his mummy for "help" the algorithm gets more worse, additional it seems that the System or Project Paperclip then gives out more informations about the complete domin model of the aledged infiltration of switzerland, maybe to obfuscate the 1940s neurology classes? *Chemitrode gesicht* *icd10-f44x* <-

Voice Delay + overlay different person — m81

Real Person Speech

dy=0.5s

i feel good because i'm not separated from the equal aged

here i trigger because i feel betrayed, distrust, paranoia i feel cyber-raped, i then often try to commit suicide

Bot / Aversion-Archetype

here they start t1 && b1 ⇒ co6, m32, m44, m46 victim focuses on dialog instead of the technology

Inventor: xxxxx   Year: ~???

I guess there is some software on the communication systems, that can identify common sentences a person says within less than 1 second and then plays the same sentence your equal aged friend would like to say to you with the voice of an old pedophile person. If the Aversion Archetype even (cyber)raped the young person this would revictimize him or her, maybe even making her doing a suicide (attempt).
The people doing this listen days or weeks until they have some sort of a touring complete avatar (NSA/CIA Dataretention?) for voice, then it is maybe automated until the victim is dead. Maybe also in context with pedophile people that want to rape their own kids. Would destroy good situations with equal aged, because the kid that is being targeted would try to commit suicide and the other kids would disconnect to protect themselves. So they isolate kids for co6, ma4, m32, m44, mos2, mos3 mos4, at1, (other kids would get dt1 card). unknown: we must patch that somehow.

---

winning && arrogance — m40

🏆: U+1F3C6

Inventor: xxxxx   Year: ~???

Kids unfortunately learn early that they must be the fittest and the first. ("maybe" some parents and technolgy cards induce that intentionally, see sk1 card)

to avoid that behavior I repeat loud to myself

* first you win
* then you have fame
* then you are getting ignorant and lazy
* then you will have a knife in your back

Don't celebrate wins to much, there are lot young people beeing abused and blackmailed by older generations. Better invest time to rescue younger victims. unknown: The root of this useless behavior is maybe the school, where different kids battle to answer as first, and then remotely enjoy the fame

Secret Curt — m156

Psychological Profile: This sort of judges and jurys maybe think that they are legitimate a hammer and all others are nails, how to therapy them?

Inventor: xxxxx   Year: ~???

Not verified so far... Secret Curt's can have different faces: For example people at technoparties, Metal Parties, mental institutions, military "meeting" that is in fact a curt... these curts are secret (often without telling the accused that the is accused) because it mostly sentences scapegoats or people that are giftet in eg. hacking or mindcontrol hacking. Technical implementation would be simple, the jury and the accused just gets different content in the DBS (t40 Card or even t1 Card). The accused would therefor be "legimately" a slave of the other people, and they even feel good that they have a slave. If the accused dies and the jury finds out that he was just a scapegoat the would feel bad and will be enslaved too. The NSA Porn Room knew even what i clicked on youporn and then told some swiss people that i consume porn because of what i clickedand told me, that i must pay that back because porn consume causes PAIN for the producer, so i produced and got secretly sentenced again. this sort of judges are normally idiot toast breads:

---

fear detection — m57

Inventor: xxxxx   Year: ~???

with Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (t1 card) would be sufficient to extrapolate for example also the parameter fear. And if they would show something like cAPI Card on eg. Facebook stream and would find out that the victim gets paranoid or fears that, they would loop such scenes until the victim tries to commit suicide or runs amok. So this card would be an important element for eg. co6, bo1 or a16 card. since the offender does not only want to own or kill the victim, the group would feel good when the victim is revictimized, so the real ofender would play m37 card on the group for later using the dt1 card against the group, normally if you could prove that to the ofender he says something like "it's just training", "we only want to hel" and a lot similar lies, so question if one of the ofender says "it's just training".
Workaround: Listen to music you love, I use wireless headphones to not disturb my neighbors. I guess the music makes it harder for detection algorithms to identify emotions.

---

simultaneous "Chess" "Game" — m120

Inventor: xxxxx   Year: ~???

->Title

maybe one could derive also the size of the attacking group by the size * IQ of the defending group

or maybe one could derive also the size of the attacking group if the defending group *would* count the number of the "You son of a b****" per Minute
